The new Carnival

Movement that inspires

A companion for picturesque moments

From the futuristic headlamps embedded into the tiger-nose grille, to the broad dramatic stripe of the rear combination taillights, fresh details establish a luxurious new design vernacular among people mover. Sleek body lines serve an aerodynamic purpose, while the expansive windows complement the cabin's feeling of openness.

The versatility to handle whatever the future brings

With various seating configurations, it's hard to think of a more accommodating and flexible interior than this.

Smart Power Sliding Doors and Smart Power Tailgate

Smart power sliding doors offer easy entry and exit for rear occupants. Along with the Smart power tailgate, all doors can be closed and locked with one smart-key button as you walk away.

11-Seater

11 seats

2nd and 3rd row jump-seat folding

4th row pop-up sinking

3rd row seatback folding and sliding

8-Seater

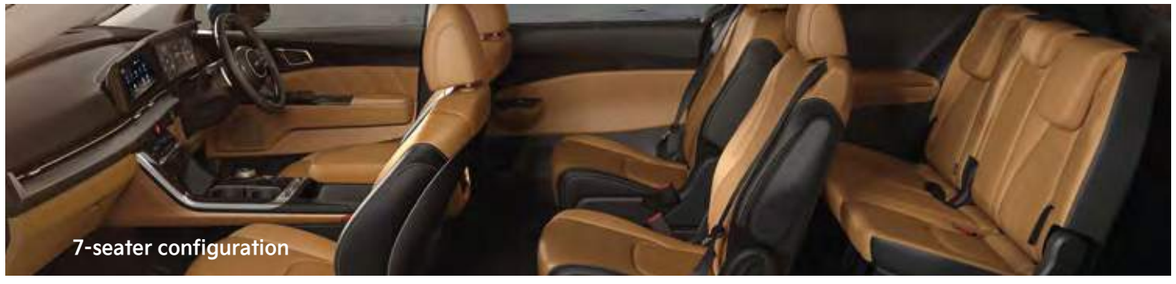
8-seater configuration

3rd row 60:40 split-fold

Child care mode

7-Seater

7-seater configuration



Individual comfort for every single seat

With firm, welcoming seats, enviable headroom, and tasteful materials, the Carnival comfortably accommodates every individual occupant. From the way the doors slide to how the seats can be adjusted and moved, the interior is engineered to make the ride a joy for everyone inside.

Multi-function free mode seat

For the 8-seater model only, the 2nd row seat can be removed and turned to face the 3rd row seat. Or turn and fold the center seat only to create a shared table.

Premium Relaxion seats

Second-row Relaxion seats give passengers a first-class experience. In Relaxation mode, the seat's back reclines, the front of the seat base tilts upward, and the leg support lifts and extends.

Luggage mode

The 2nd row seats can be removed, and 3rd row seats folded down to accommodate full cargo capacity.

Ventilated and heated seats

3-step adjustable ventilated and heated seats offer a comfortable seating environment.

Surrounded by screens that say just enough

Information technology has changed driving forever. The cockpit is designed and engineered to help you focus on the key information while your mind stays on the road and what's around you.

12.3-inch Supervision Cluster

The supervision cluster helps you stay focused and informed with key driving information.

12.3-inch Capacitive Touch-Screen

View and select audio functions on the 12.3-inch capacitive touch-screen display with Apple CarPlay® & Android Auto™ connectivity. Choose audio sources, tune in to radio stations, and adjust audio quality to taste by using convenient controls mounted on the steering wheel.

Bose® premium sound system

Feel the bass with an available Bose® 12-speaker premium audio system that delivers immersive sound powered by a dedicated external amplifier.

Smartphone wireless charger

The charging pad in the wireless charging tray bin lets you charge compatible mobile phones wirelessly.

Surround View Monitor (SVM)

Manouvre easily when you park your car with the 360-degree surround view, high-resolution display and variable guidelines.

Less vibration, less fuel and all the power you need

The Smartstream 2.2L Turbo diesel engines of the new Carnival offers significant fuel savings through advanced technologies such as improved cooling and reduced friction. The 8-speed automatic transmission offers smooth gear changes, with more gear ranges to achieve the perfect balance of economy and power.

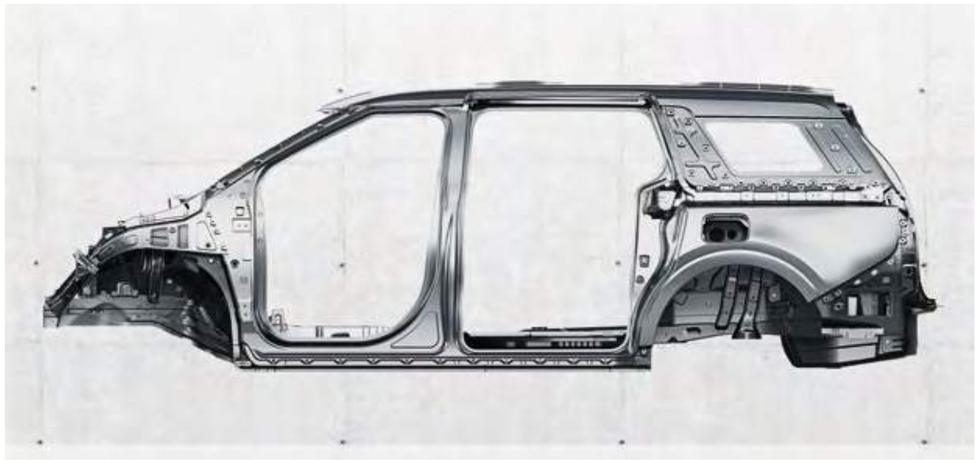
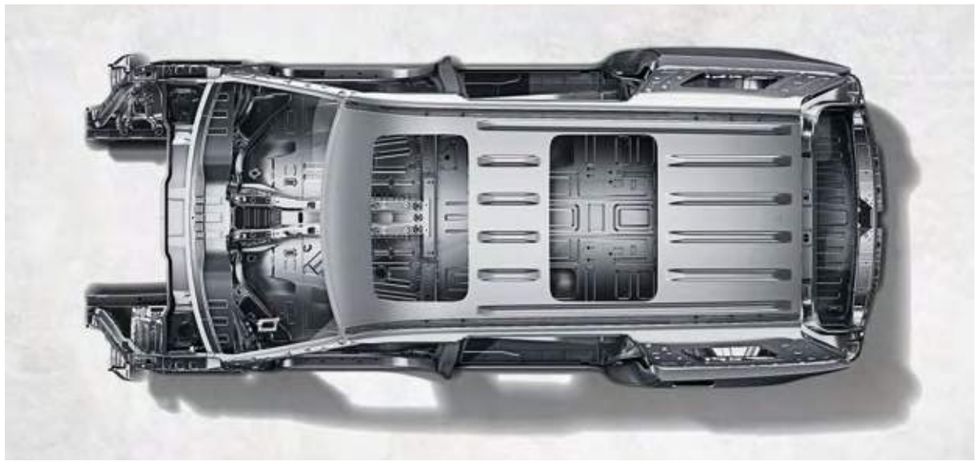
We've thought of everything to keep you ready for anything

Building on an integrated new platform, the Carnival uses technological advances such as improved body materials and chassis rigidity to better protect you in the event of a collision.



3rd generation platform

The new 3rd generation platform standardises the arrangement of steering, chassis, powertrain and cabin floor, resulting in a more spacious cabin and improved aerodynamics, handling, stability and collision safety performance. The Carnival benefits from advances made across the entire range of Kia vehicles.



Smarter body and chassis materials

New applications of stronger, more formable steel in crucial areas helps the body and chassis better disperse collision forces to improve occupant protection. Higher torsional rigidity delivers an impressive level of handling responsiveness and ride smoothness.

Image shown is for illustration purpose only. Actual specification and seat colour will vary.

7 airbags

To help protect occupants and potentially reduce injuries in the event of a collision, seven airbags are standard (driver, driver's knee, front passenger, two front-side, and two side-curtain).

Hill-Start Assist Control (HAC)

When you're at a standstill on an incline, HAC prevents you from rolling backward by gently applying the brakes for a short moment while you move your foot from the brake pedal to the accelerator.

Class-leading safety technologies, travel with peace of mind

The Carnival offers a wide range of high-tech safety features for a truly safe drive, so that you feel secure and knowing you and your passengers are well protected while travelling to explore.

Safe Exit Assist (SEA)

Before your passengers exit, standard Safe Exit Assist can scan for oncoming hazards, sounding an alert and stopping the sliding doors to help avoid danger.

Rear Occupant Alert (ROA)

This standard feature can sounds an alert to remind of rear seat occupants when exiting the vehicle.

Multi Collision Braking (MCB)

The Multi Collision Braking (MCB) system engages automatic braking when an airbag is deployed during a primary collision to help mitigate a secondary collision.

High Beam Assist (HBA)

When High Beam Assist (HBA) detects headlights of oncoming cars, tail lights in front of the Carnival or there is enough ambient lighting, it will automatically turn off to prevent blinding other drivers. It will also automatically turn on in low ambient lighting.

Blind-Spot Collision-Avoidance Assist (BCA)

The system helps prevent or reduce the risk of collision with vehicles in the adjacent lane or coming from behind when the driver switches lanes through audio-visual alerts and steering feedback.

Rear Cross-Traffic Collision-Avoidance Assist (RCCA)

Rear corner radars detect the presence of cross traffic, from the right or left, in the lane the Carnival is backing into. If a vehicle is detected, the system will alert the driver.

Lane Keeping Assist (LKA)

Provide audio & visual alerts if you indicate into a lane that has an adjacent vehicle to get you back to the right place.

Forward Collision-Avoidance Assist (FCA) with Junction Turning

FCA with Junction Turning uses sensors and cameras to scan the road ahead for hazards, alerting the driver and even applying the brakes to help prevent a collision when a hazard is detected, even when turning through an intersection.

Lane Following Assist (LFA)

To help you stay in the center of your lane, LFA identifies the lane's boundaries using the front view camera. If it senses that you're drifting out of the lane, it automatically steers the vehicle to keep it centered between the lines.

Smart Cruise Control (SCC)

With a simple touch of a button, SCC will maintain the driver's selected speed. Using the front view camera and front radar, the system allows the vehicle to automatically maintain a safe following distance, reduce speed, and even come to a complete stop and start again, if necessary.
